BHRT ACADEMY

LEARN TO PRESCRIBE BIOIDENTICAL HORMONES

A comprehensive, cost effective, and convenient online training program that helps medical providers learn BHRT so they can increase revenue, patient satisfaction and referrals.

PROGRAM OVERVIEW:

Learn at your own pace, on your own schedule, from any device. No travel required. The online lessons of 15+ hours of educational training on hormones and BHRT are purposefully designed in short 5-10 minute segments so that busy providers can watch anytime on any device: during lunch, between patients, while cooking dinner or folding laundry. Lessons are organized for quick reference.

Providers are supported with ongoing small group mastermind mentoring twice a month while taking the Clinical Education lessons with other students. Advanced clinical education webinars will be held monthly for continuing education and research updates. Private Facebook group for case reviews and peer support.

- In-depth review of research and evidence supporting HRT
- Comparison of non-bioidentical to bioidentical hormones
- Compounded versus conventional BHRT
- Hormone physiology
- Signs and symptoms of hormone excess and deficiencies
- Typical patient profiles
- Testing options
- Understanding and interpreting lab results
- Female and male protocols
- Nutriceutical protocols
- Role of thyroid and HPA axis in hormone balance
- Case studies
- Office visit protocols
- Bonus course contribution from leading experts on BHRT
- Includes downloadable manual
